The application has been amended as follows:

In The Claims

Claim 1, in line 17, delete "resulting".

Claim 4, in line 3, insert -.- - after "device".

Claims 8 and 9, in lines 1-2, replace "ATM signaling processing unit" with - -signal processor- -.

Claim 11, in line 3, replace "ATM network" with - -ATM service- -.

Claim 14, in line 9, replace "and" with - -or- -.

Claim 14, in lines 11 and 14, replace "and the head-end" with - -or the head-end- -.

Claim 19, in line 1, replace "wherein necessary" with - -wherein a necessary- -.

Claim 21, in line 1, replace "The network communication unit" with - -The apparatus- -.

Claim 25, in line 4, replace "a data" with - -the data- -.

Claim 29, in line 2, replace "multiplies" with - -multiplexes- -.

Allowable Subject Matter

2. Claims 1-5, 8-22, and 24-31 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest wherein the central office unit of LMDS comprises a network connection unit for multiplexing and de-multiplexing data stream having ATM cell structure and wherein the network connection unit further comprises a signal processor for setting a virtual channel and a channel speed, and providing an ATM service corresponding to the virtual channel; and a call processor having a MAC controller for controlling user modems according to MAC instructions when the signal processor is operating, as specified in independent claims 1 and 25.

The prior art does not teach or fairly suggest establishing a virtual channel by performing a protocol communication from a first physical layer for prescribing wireless access media, to a second physical layer for providing wireless media control, of the customer premises equipment and either the network connection unit or the head-end unit; connecting a communication path from one of the network connection unit or the head-end unit to a terminating party by performing a protocol communication between an adaption layer for signal processing to a user network interface layer of the CPE and either one of the network connection unit or the head-end unit, as specified in independent claim 14.

The prior art does not teach or fairly suggest a network communication unit of a LMDS wherein the network communication unit comprises a signal processor that establishes a virtual channel to enable bi-directional communication of the data stream with a destination; and wherein the signal processor sets the virtual channel and a channel speed and provides an ATM

service corresponding to the virtual channel, and the controller accesses user modems according to the medium access control instructions and assigns time slots and channels for communication with the user modems, as specified in independent claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
